

NAVEEN KUMAR YADAV

React Developer

Mobile: +91-9123234015 Email: nkdeep310@gmail.com

PROFILE SUMMARY

- Results-driven **React Developer** with 4+ years of experience building scalable, high-performance single-page applications, specializing in **React.js, Redux, TypeScript, and modern component-driven UI architecture**.
- Proven track record designing reusable component libraries, optimizing rendering performance, and integrating React front-ends with RESTful APIs and Node.js/Express.js backends.
- Skilled in state management (**Redux, Context API**), performance techniques (code splitting, memoization, lazy loading, virtualization), and responsive UI development with HTML5, CSS3, and TypeScript.
- Experienced collaborating with UI/UX and backend teams in Agile environments, delivering pixel-accurate, accessible interfaces integrated with MongoDB/MySQL-backed services.
- Familiar with cloud deployment (Azure), Git-based version control (Bitbucket, GitLab), and DevOps/JIRA-driven delivery pipelines.

CORE COMPETENCIES

• React.js Development	• Redux & Context API	• TypeScript
• UI/UX Implementation	• Component Architecture	• Performance Optimization
• REST API Integration	• Responsive Web Design	• Agile Methodologies

TECHNICAL SKILLS

- Frontend:** React.js, Redux, Context API, TypeScript, JavaScript (ES6+), HTML5, CSS3, Angular, Vue.js
- Backend:** Node.js, Express.js, Java, Spring Boot
- Databases:** MongoDB, MySQL
- Version Control:** Git, Bitbucket, GitLab, JIRA
- Tools & IDEs:** Visual Studio Code, Postman, PgAdmin, IntelliJ
- Other:** REST API Development, Microservices Integration, Cloud Deployment (Azure), UI Design, Application Migration

EDUCATION

- Master of Computer Applications — Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, Uttar Pradesh, 2021

WORK EXPERIENCE

Software Engineer — Nekstron Control and Automation Pvt Ltd, New Delhi Oct 2024 – Present

Role:

- Developed interactive, responsive **React.js** dashboards and meter-monitoring interfaces using TypeScript, HTML, and CSS for a real-time IoT data platform.
- Led the development and enhancement of full-stack web applications, improving front-end performance, scalability, and maintainability.
- Designed and implemented 80+ RESTful APIs in Java + Spring Boot and Node.js/Express.js, ensuring seamless data flow into React-based front-end components.
- Implemented microservices architecture, security best practices, and efficient exception handling across the stack.

Key Achievement:

- Enhanced front-end user interface and back-end components, improving operational efficiency and driving higher user satisfaction and engagement.
- Delivered highly reusable, modular UI and API components, reducing code duplication and increasing development efficiency.

Software Engineer — Samin Tekmindz India Pvt Ltd, Noida June 2022 – Oct 2024

Role:

- Built responsive **React.js** front-ends with TypeScript, HTML, and CSS for an EV charging network platform, integrated with Spring Boot microservices.
- Utilized **Redux** for centralized state management, effectively handling complex application state and data flow across components.
- Integrated RESTful APIs to facilitate seamless real-time data exchange between React front-ends and MongoDB/MySQL-backed services.

- Applied performance optimization techniques — code splitting, memoization, lazy loading, and virtualization — to significantly improve application speed.

Key Achievement:

- Drove user engagement up by 20% and reduced bounce rates by 15% through strategic front-end enhancements to Java-based web applications.
- Collaborated with cross-functional teams to deploy new React features integrated with cloud servers, ensuring seamless updates and performance.
- Handled user management API integration for adding, editing, deleting, and activating/deactivating users.
- Built reusable **React component libraries** and code modules, reducing future development time by 45%.

JavaScript Developer — Xscriptech Pvt Ltd, Noida Nov 2021 – May 2022

- Collaborated with the design team to convert UI/UX designs into interactive, pixel-accurate **React.js** web pages.
- Developed React.js components and state management logic to verify user purchases on login, ensuring users could access only purchased courses — improving security and delivering a personalized UI experience.
- Environment: React.js, Node.js, MySQL, TypeScript

PROJECTS

MDM – Water Meter | Nekstron Control and Automation Pvt. Ltd. | Oct 2024 – Present

- Environment: React.js, TypeScript, HTML, CSS, Java, Spring Boot, Node.js, MongoDB, MySQL
- Developed interactive and responsive **React.js** front-end interfaces (TypeScript, HTML, CSS) for consumer dashboards and real-time meter monitoring.
- Built and maintained RESTful APIs with Node.js and Express.js to support real-time data exchange between the HES server and internal modules.
- Designed Java Spring Boot APIs to fetch and process real-time data from the HES server in a hybrid API workflow feeding the React front-end.
- Ensured end-to-end data flow from front-end to back-end, maintaining API performance, security, and scalability.

EV Charging Project | Samin Tekmindz India Pvt. Ltd. | June 2022 – Oct 2024

- Environment: React.js, TypeScript, HTML, CSS, Java, Spring Boot, MongoDB
- Built the front-end for a comprehensive EV charging network platform covering strategic locations, supporting a 30% network expansion within one year.
- Developed data-driven React views for usage monitoring, contributing to a 15% increase in charging station placement efficiency and a 20% improvement in operational efficiency.
- Handled performance optimization through code splitting, memoization, lazy loading, and virtualization to significantly improve application speed.
