

PROFILE SUMMARY

- Results-driven **Java Full Stack Developer** with 5+ years of experience designing, developing, and deploying scalable enterprise applications using **Java, Spring Boot, and React.js**.
- Strong expertise building and integrating **RESTful APIs** with Java/Spring Boot backends and **React.js/Redux/TypeScript** front-ends, delivering seamless end-to-end functionality.
- Hands-on experience with microservices architecture, relational and NoSQL databases (**MySQL, MongoDB**), and cloud deployment on **Azure**.
- Skilled in Agile/Scrum delivery, code versioning (Git, Bitbucket, GitLab), CI/CD workflows, and JIRA-based project tracking.
- Proven ability to improve application performance, reduce code duplication, and increase development efficiency through reusable component and API design.

CORE COMPETENCIES

• Full-Stack Development	• Java & Spring Boot	• React.js Development
• Microservices Architecture	• REST API Design	• Redux & Context API
• Database Management	• Agile Methodologies	• UI/UX Implementation

TECHNICAL SKILLS

- Languages:** Java, JavaScript, TypeScript, SQL, HTML5, CSS3
- Backend / Java:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, RESTful Web Services, Microservices, Maven
- Frontend / React:** React.js, Redux, Redux Toolkit, Context API, React Hooks, React Router, Node.js, Express.js
- Databases:** MySQL, MongoDB, PostgreSQL (PgAdmin)
- Testing:** JUnit, Mockito, Jest, React Testing Library
- API & Integration:** REST APIs, JSON, JWT, OAuth2, Postman
- DevOps / Cloud:** Azure, Docker, CI/CD Pipelines, Jenkins (familiar)
- Messaging (familiar):** Kafka / RabbitMQ
- Version Control & Tools:** Git, Bitbucket, GitLab, JIRA, Visual Studio Code, IntelliJ IDEA, Postman
- Methodologies:** Agile/Scrum, SDLC, Design Patterns, Application Migration

EDUCATION

- Master of Computer Applications — Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, Uttar Pradesh, 2021

WORK EXPERIENCE

Software Engineer — Nekstron Control and Automation Pvt Ltd, New Delhi

Oct 2024 – Present

Role:

- Led development and enhancement of full-stack web applications using **Java, Spring Boot, and React.js**, improving performance, scalability, and maintainability.
- Designed and implemented 80+ RESTful APIs in **Java + Spring Boot**, ensuring seamless integration between React.js front-end and backend systems.
- Built interactive, responsive **React.js** dashboards and meter-monitoring interfaces (TypeScript, HTML, CSS) for a real-time IoT data platform.
- Enhanced backend modules by implementing microservices architecture, security best practices, and efficient exception handling.

Key Achievement:

- Delivered highly reusable and modular API and UI components in Java and React, reducing code duplication and increasing development efficiency.
- Improved operational efficiency and user satisfaction through combined back-end and front-end optimization.

Software Engineer — Samin Tekmindz India Pvt Ltd, Noida

June 2022 – Oct 2024

Role:

- Developed and maintained **Spring Boot microservices** integrated with MongoDB and MySQL for high-performance backend operations.
- Built responsive **React.js** front-ends (TypeScript, HTML, CSS) and utilized **Redux** for centralized state management across complex application flows.
- Integrated RESTful APIs to facilitate seamless real-time data exchange between front-end and back-end systems, improving application performance.

Key Achievement:

- Drove user engagement up by 20% and reduced bounce rates by 15% through strategic full-stack enhancements to Java-based web applications.
- Collaborated with cross-functional teams to deploy new features integrated with cloud servers, ensuring seamless updates and performance.
- Handled user management API integration for adding, editing, deleting, and activating/deactivating users.
- Built reusable React component libraries and Java code modules, reducing future development time by 45%.

Lead Developer — Xcriptech Pvt Ltd, Noida Nov 2021 – May 2022

- Collaborated with the design team to convert UI/UX designs into interactive **React.js** web pages.
- Developed React.js components and state management logic to verify user purchases on login, ensuring users could access only purchased courses — improving security and delivering a personalized UI experience.
- Environment: React.js, Node.js, MySQL, TypeScript

PROJECTS

MDM – Water Meter | Nekstron Control and Automation Pvt. Ltd. | Oct 2024 – Present

Environment: Java, Spring Boot, MongoDB, Node.js, MySQL, React.js, TypeScript, HTML, CSS

- Designed and developed Java Spring Boot APIs to fetch and process real-time data from the HES server.
- Built and maintained RESTful APIs with Node.js and Express.js to support real-time data exchange between the HES server and internal modules.
- Implemented a hybrid API workflow where Java APIs read/store HES data and Node.js APIs interact with Java services to provide data for the React front-end.
- Developed interactive, responsive React.js front-end interfaces (TypeScript, HTML, CSS) for consumer dashboards and meter monitoring.
- Ensured end-to-end data flow from front-end to back-end, maintaining API performance, security, and scalability.

EV Charging Project | Samin Tekmindz India Pvt. Ltd. | June 2022 – Oct 2024

Environment: Java, Spring Boot, MongoDB, React.js, TypeScript, HTML, CSS

- Led a multidisciplinary team to establish a comprehensive EV charging network covering strategic locations, resulting in 30% network expansion within one year.
- Built the React.js front-end for usage monitoring, contributing to a 15% increase in charging station placement efficiency and a 20% improvement in operational efficiency.
- Handled performance optimization through code splitting, memoization, lazy loading, and virtualization to significantly improve application speed.
